Jakarta Utara, DKI Jakarta, Indonesia

PROFESSIONAL SUMMARY

Quality Assurance professional with hands-on experience in In-Process Quality Control (IPQC) at PT Tera Data Indonusa and a Bachelor's Degree in Industrial Engineering from Politeknik STMI Jakarta. Experienced in First Piece Inspection (FPI), process audits, BOM and material verification, and non-conforming product control. Skilled in 8D Problem Solving, RCA, QC Seven Tools, PDCA, and CAPA. Contributed to a cross-functional quality improvement project that reduced average monthly Cover D Scratch process faults by 90.2%.

PROFESSIONAL EXPERIENCE

PT TERA DATA INDONUSA – **Cakung, Jakarta Timur, DKI Jakarta** Sep 2024 - Present

Quality Assurance – In-Process Quality Control (IPQC) Staff

- Perform First Piece Inspections (FPI), line-readiness checks, process audits, and operator compliance checks to ensure adherence to Work Instructions (IK/E-SOP), quality standards, tools, equipment, and approved manufacturing processes.
- Verify SRORD, BOM, item codes, material specifications, components, and accessories while managing nonconforming products to maintain traceability and prevent material or specification mismatches.
- Investigate process defects, quality abnormalities, and customer complaints using RCA, 5 Whys, Fishbone Diagrams, QC Seven Tools, and 8D Problem Solving; coordinate containment, CAPA, and Stop Line actions with Production and Process Engineering teams.
- Analyze quality performance and defect trends using Pareto Charts, Check Sheets, audit/patrol reports, Non-Conformity Reports, and DOA/NG data to support daily and weekly quality reviews and continuous improvement.
- Deliver Quality Awareness briefings and onboarding training; support process standardization and cross-functional quality improvement.

PT TERA DATA INDONUSA – **Cakung, Jakarta Timur, DKI Jakarta** May 2024 - Sep 2024

Production – Production Operator

- Performed laptop assembly and component installation in accordance with work instructions, quality standards, and approved manufacturing procedures.
- Conducted functional verification and self-inspection to ensure product quality and prevent nonconforming products from proceeding to subsequent production stages.
- Ensured material and component readiness while maintaining production efficiency and adhering to quality, safety, and productivity standards through the application of 5S and Lean Manufacturing principles.

PT PERTAMINA LUBRICANTS – **Jakarta Utara, DKI Jakarta** Mar 2022 - May 2023

Production & Engineering Intern

- Analyzed downtime on Filling Lithos Line 1 using RCM, FMEA, and Pareto Analysis to identify critical equipment and failure risks.
- Developed preventive maintenance recommendations using Age Replacement, including equipment inspection and component replacement intervals.
- Prepared CAD Piping and Instrumentation Diagrams (P&IDs) for the grease production pipeline and supported production planning using forecasting methods and evaluated production targets against actual output.

KEY PROJECTS & ACHIEVEMENTS

PT TERA DATA INDONUSA – **Cakung, Jakarta Timur, DKI Jakarta** Sep 2024 - Present

Cover D Scratch Quality Improvement | Quality Improvement

Reduced average monthly Cover D Scratch process faults by 90.2%, from 17 to 1.67 cases/month, with zero-defect periods recorded. Applied 8D Problem Solving, RCA, 5 Whys, QC Seven Tools, process standardization, OJT, equipment calibration, and Double Stopper implementation.

Digital Quality Finding & Risk Assessment System | FMEA-Based Quality Management

Developed a Google Forms-based quality finding reporting system incorporating Severity, Occurrence, and Detection (SOD) criteria to support risk prioritization, traceability, and corrective action monitoring.

Automated Daily Review Reporting Template | Production & Quality Analytics

Developed and implemented an automated spreadsheet-based daily reporting template to streamline production and quality data compilation, improve reporting efficiency, and support management performance reviews.

PT PERTAMINA LUBRICANTS – **Koja, Jakarta Utara, DKI Jakarta** Mar 2022 – May 2023

Reliability Centered Maintenance – Filling Lithos Line 1 | Maintenance & Reliability Improvement

Applied RCM, FMEA, Pareto Analysis, RPN, and Age Replacement to identify critical equipment and develop preventive maintenance strategies. Identified the Vacuum component (RPN 72) and proposed 10-day replacement and 7-day inspection intervals, with estimated downtime reduction from 14.25 to 5.91 hours.

Production Planning & Forecasting – Grease Product | Production Planning & Forecasting

Compared five forecasting methods and selected Least Squares (Linear) as the lowest-error method (MAPE 37.60%). Developed a 12-month Master Production Schedule (MPS) to support production planning and material availability.

TECHNICAL SKILLS

- **Quality Assurance & Process Control:** First Piece Inspection (FPI), In-Process Inspection, Process Audits, BOM & Material Verification, Nonconforming Product Control.
- **Problem Solving & Quality Improvement:** Root Cause Analysis (RCA), 5 Whys, Fishbone Diagrams, 8D Problem Solving, QC Seven Tools, CAPA, Pareto Analysis.
- **Process Improvement & Risk Analysis:** Failure Mode and Effects Analysis (FMEA), Process Standardization, Work Instructions (IK/E-SOP), 5S, Continuous Improvement.
- **Data & Engineering Tools:** Microsoft Excel (Quality Data Analysis & Automated Reporting), Google Forms (Digital Quality Reporting), Minitab, Microsoft PowerPoint, Microsoft Visio, AutoCAD.

EDUCATION

Politeknik STMI Jakarta Kemenperin RI - **Jakarta, Indonesia** Aug 2019 – Sep 2023

Bachelor's Degree in Industrial Engineering | 3.63/4.00 | Cum Laude

- THESIS: PERANCANGAN PERAWATAN KOMPONEN KRITIS MESIN PADA FILLING LITHOS LINE 1 DENGAN METODE RELIABILITY CENTERED MAINTENANCE UNTUK MEMINIMASI DOWNTIME DI PT PERTAMINA LUBRICANTS PRODUCTION UNIT JAKARTA.

CERTIFICATIONS

Badan Nasional Sertifikasi Profesi (BNSP) | 2023

- Production Planning and Control Competency Certification

ORGANISATIONAL EXPERIENCE

Himpunan Mahasiswa Teknik Industri | Information & Communication - **Jakarta, Indonesia** Aug 2021 - Jan 2022

Contributed to content creation, promotional materials, event documentation, and multimedia support for organizational programs including HMTI Study Club and TRAIN.
